

Grade 8 Social Sciences

Term 2 Activities

The Mineral Revolution and Weather & Climate

ACTIVITY 1

Mine Compounds

Source B: Black men lived in closed compounds on the mines, they ate and slept there between shifts

- 1.1 Define a...
 - a) Compound (2)
 - b) Closed Compound (2)
- 1.2 What aspects of compound life does this photograph highlight? (2)
- 1.3 Name any reason that might have led to the picture to be taken. (2)

Total Marks

(8)

ACTIVITY 2

The Mineral Revolution and Labour Control

- 2.1. What is the term used to describe South Africa's shift from farming to mining due to the discovery of minerals? (1)
- 2.2. Explain why closed compounds were introduced for black mine workers. (2)
- 2.3. Describe two ways in which mine owners controlled workers to prevent diamond theft. (4)
- 2.4. How did the system of migrant labour benefit both African workers and mine owners? (2)
- Total Marks (9)**

ACTIVITY 3

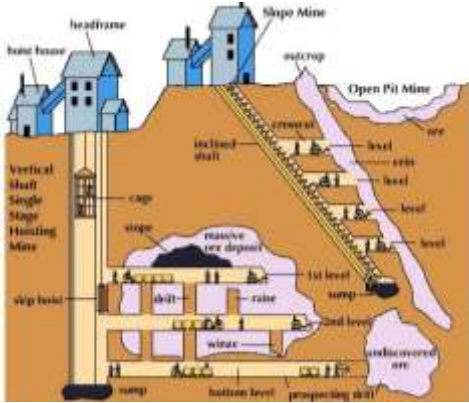

Land Dispossession and Defeat of African Kingdoms

- 3.1. What is the term used when a group is forcibly removed from its land? (1)
- 3.2. Name two African kingdoms defeated by the British or Boers by 1879. (2)
- 3.3. Explain why the British and Boers wanted control over land after diamonds were discovered. (4)
- 3.4. How did the defeat of African kingdoms impact African labour patterns? (2)
- Total Marks (9)**

ACTIVITY 4

Working Conditions Underground

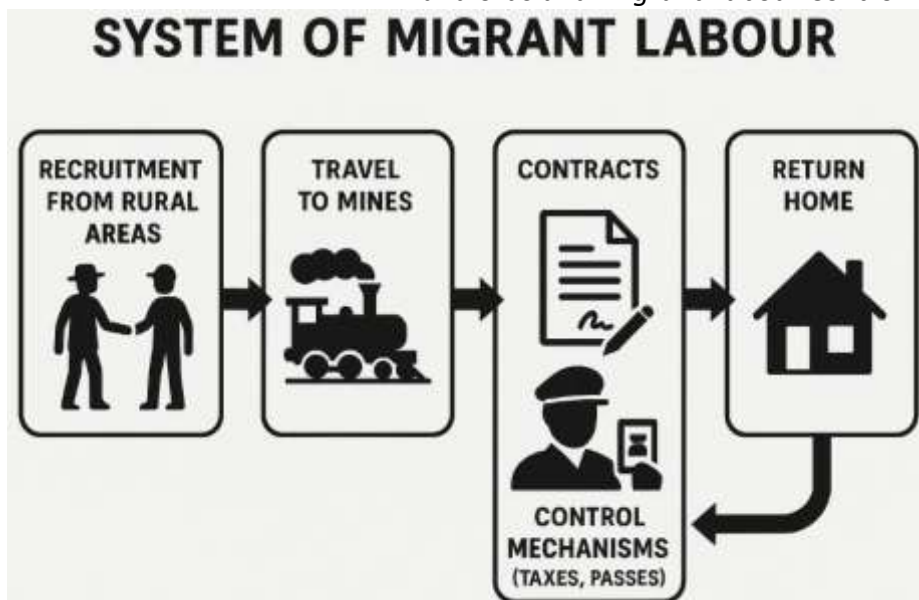

- 4.1. What is the term for lung disease caused by inhaling dust in mines? (1)
- 4.2. Explain the two major dangers of working underground in South African gold mines. (4)
- 4.3. Describe the physical environment and daily experiences of underground miners. (3)
- 4.4. How did music, especially songs like "Shosholoza," help miners cope? (2)

Total Marks

(9)

ACTIVITY 5

Randlords and Migrant Labour Control

- 5.1. What was the group of wealthy mining leaders in Johannesburg known as? (1)
- 5.2. List two reasons why individual miners could not operate gold mines alone. (2)
- 5.3. Describe two methods used by the Chamber of Mines to control migrant labour. (4)
- 5.4. Explain how the pass system affected black job seekers on the Witwatersrand. (2)

Total Marks

(9)

ACTIVITY 6

Women in Reserves and Family Erosion

- 6.1. What is the term for the weakening or breakdown of family structures? (1)
 - 6.2. List two reasons why women in the reserves faced increased hardships. (2)
 - 6.3. Describe how labour migration affected rural family life. (3)
 - 6.4. Explain why the reserves became poorer while mines grew richer. (2)
- Total Marks** (9)

ACTIVITY 7

Increasing burden on Women and Children left on their own in rural areas during the mineral revolution
Source C:

- 3.2.1 Why are children and women left on their own? (2)
- 3.2.2 Explain TWO examples of domestic chores that caused an increase in the burden of women in reserves. (4)
- 3.2.3 Family erosion occurred because of women and children being left on their own. What is family erosion? (2)
- 3.2.4 Why did reserves get poor and poorer, regardless of men working? (2)
- 3.2.5 Black miners and White miners were not treated the same. Explain TWO ways in which black miners were discriminated. (4)

(14)

ACTIVITY 7

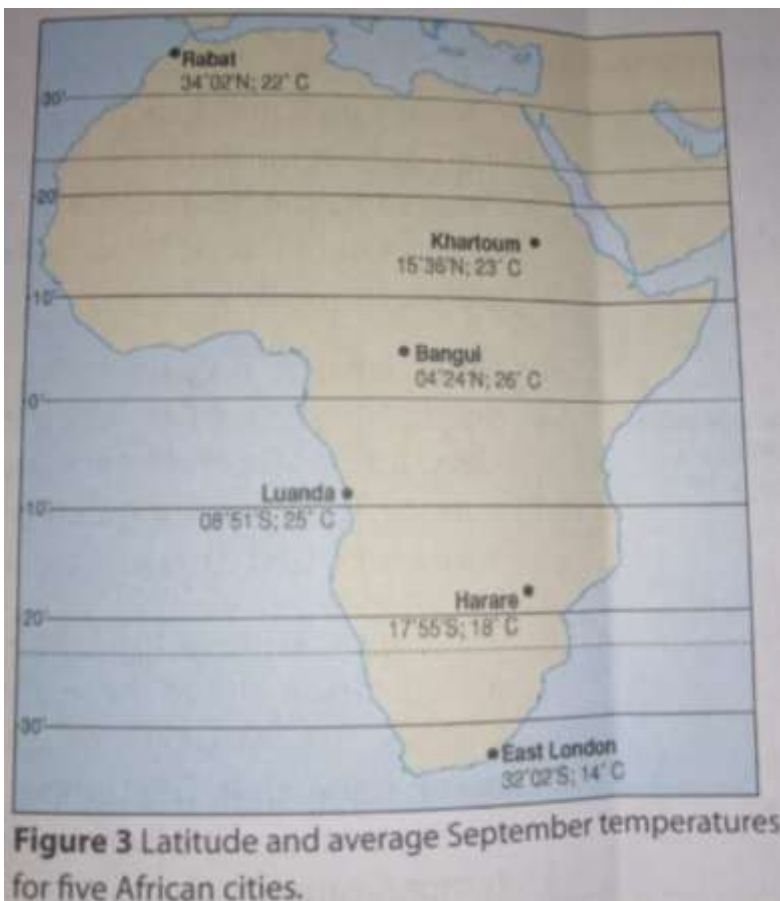

In a paragraph of about 8 lines, discuss four ways in which mine workers resisted the appalling, bad and harsh conditions of the mines. (8)

ACTIVITY 8

In a paragraph of about 8 lines explain and discuss FOUR ways in which the Randlords (mine owners) systematically controlled the migrant workers of the mines (8)

ACTIVITY 9

- 9 Refer to the diagram below and answer the questions that follow

Correct the following sentences by choosing the correct word for the ones in brackets.

Write only the correct word . e.g dry / dry and rainy

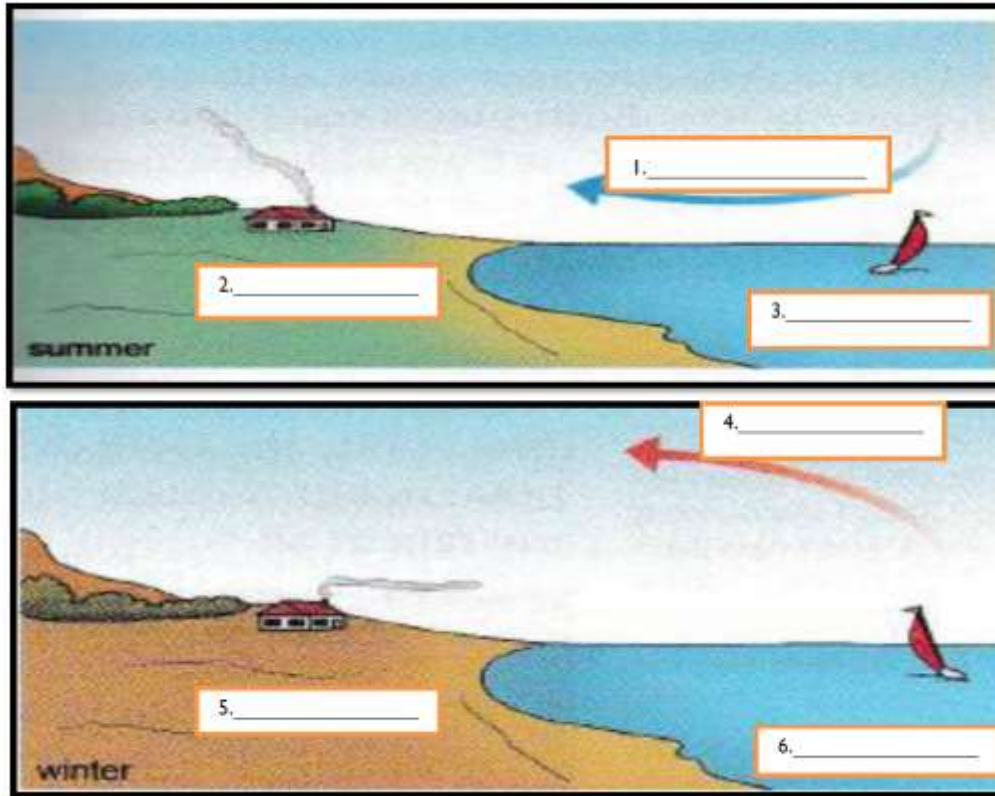

- 9.1 Warm air from the ocean will (*raise/lower/ not affect*) temperatures of places next to the coast. (2)
- 9.2 Places by the sea have (*cooler/ warmer/ wetter*) summers and (*drier/ cooler / warmer*) winters than places in land. (4)
- 9.3 Places in land have (*high/low/similar*) summer temperatures and (*high/ unchanged/ low*) winter temperatures. (4)
- 9.4 Based on their latitudinal positions, Which place is warmer between Bangui and Harare. Explain Why (3)

(13)

ACTIVITY 10

- Land Warmer • Altitude • Decreases • Moist
- Land Cooler • Warm Air • Cool Sea Breeze • Warm Sea
- Small • Colder • Sea Cooler Breeze
- Large • Warmer • Sea Warmer

Look at the images below and complete them by labelling them, with the words from the wordbank. From number 7 on wards still chose from the wordbank above.

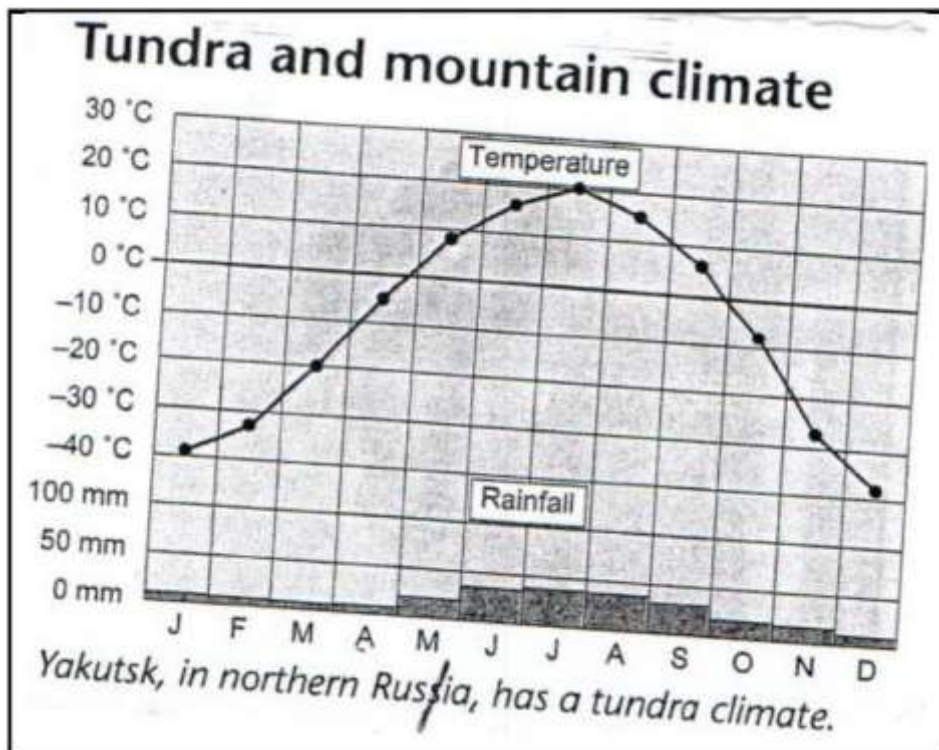

7. Places close to the coast have _____ temperature range and places far from the sea have _____ temperature ranges.
8. Rainfall is also affected by the distance from the sea. Warm _____ winds blow from the sea to the land and this usually brings rain.
9. Height above sea level is also known as _____.
10. Temperature _____ with latitude.
11. Places high above sea level are _____.
12. Places below sea level are _____.

(12)

ACTIVITY 11

11. Refer to the diagram below and answer the questions that follow

- 11.1 Which month has the highest temperature? (2)
- 11.2 Give the next two months with highest equal temperatures? (4)
- 11.3 Estimate/ How much is the rainfall for September (2)
- 11.4 In which month between January, February, March and April does temperature start to rise / increase fast? (1)
- 11.5 List and explain any THRR Factors that affect temperature and rainfall (6)
- 11.6 Name TWO elements of weather (2)

(17)

ACTIVITY 12

12. Refer to the source below and answer the questions that follow

Tropical climates occur between the equator and 25° north and 25° south of the equator. Tropical climates have high temperatures and high rainfall. The main natural vegetation is rainforests. Places close to the equator have a wetter climate than places further away. We can identify two kinds of tropical climate, a wet tropical climate and a dry tropical climate.

- 12.1 Name the main natural vegetation mentioned above (2)
- 12.2 Give TWO tropical climates mentioned in the source. (2)
- 12.3 What is common about the climate in these two regions? (2)
- 12.4 Name any other THREE kinds of climate. (3)

(9)
